**Special protective actions for fire-fighters:** Use extinguishing measures that are appropriate to local circumstances and the surrounding environment. Use water spray to cool unopened containers. Remove undamaged containers from fire area if it is safe to do so. Evacuate area.

**Special protective equipment for fire-fighters:** Wear self-contained breathing apparatus for firefighting if necessary. Use personal protective equipment.

## SECTION 6 Accidental Release Measures

### Personal precautions, protective equipment, and emergency procedures

**For non-emergency personnel:** Follow safe handling advice and personal protective equipment recommendations.

**For emergency responders:** Follow safe handling advice and personal protective equipment recommendations.

**Environmental precautions:** Discharge into the environment must be avoided. Prevent further leakage or spillage if safe to do so. Retain and dispose of contaminated wash water. Local authorities should be advised if significant spillages cannot be contained.

### Methods and materials for containment and cleaning up

**Small spill:** Soak up with inert absorbent material.

**Large spill:** For large spills, provide diking or other appropriate containment to keep material from spreading. If diked material can be pumped, store recovered material in appropriate container. Clean up remaining materials from spill with suitable absorbent. Local or national regulations may apply to releases and disposal of this material, as well as those materials and items employed in the

cleanup of releases. You will need to determine which regulations are applicable.

**SECTION 7**  
**Handling and Storage**

**Precautions for safe handling**

<b>Protective measures:</b>	See Engineering measures under EXPOSURE CONTROLS/PERSONAL PROTECTION section. Use only with adequate ventilation. Handle in accordance with good industrial hygiene and safety practice. Take care to prevent spills, waste and minimize release to the environment.
<b>Advice on general occupational hygiene:</b>	None
<b>Conditions for safe storage, including any incompatibilities:</b>	Keep in properly labeled containers. Store in accordance with the particular national regulations. Do not store with the following product types: Strong oxidizing agents

**SECTION 8**  
**Exposure Controls/Personal Protection**

**Control parameters**

**Occupational exposure limits**

<b>Ingredient name:</b>	<b>Exposure limits:</b>
Silicon dioxide (CAS: 7631-86-9)	TWA (Inhalation): 20 million particles per cubic foot (Silica) (OSHA) TWA (Inhalation): 80 mg/m <sup>3</sup> / %SiO <sub>2</sub> (Silica) (OSHA) TWA: 6 mg/m <sup>3</sup> (Silica) (NIOSH)
Distillates (petroleum), hydrotreated middle (CAS: 64742-46-7)	TWA (Inhalation): 5 mg/m <sup>3</sup> (OSHA) TWA (Inhalation): 5 mg/m <sup>3</sup> (OSHA) TWA (Inhalation): 5 mg/m <sup>3</sup> (NIOSH) ST (Inhalation): 10 mg/m <sup>3</sup> (NIOSH)

**Appropriate engineering controls:** Good general ventilation should be sufficient to control worker exposure to airborne contaminants. Processing may form hazardous compounds (see section 10). Ensure adequate ventilation, especially in confined areas. Minimize workplace exposure concentrations.

**Environmental exposure controls:** Ensure that eye flushing systems and safety showers are located close to the working place. These precautions are for room temperature handling. Use at elevated temperature or aerosol/spray applications may require added precautions.

**Individual protection measures**

<b>Hygiene measures:</b>	None
<b>Eye/face protection:</b>	Wear the following personal protective equipment: Safety glasses

**Skin protection**

- Hand protection:** Skin should be washed after contact.  
Wash hands before breaks and at the end of workday.
- Body protection:** When using do not eat, drink or smoke.  
Wash contaminated clothing before re-use.
- Other skin protection:** None
- Respiratory protection:** General and local exhaust ventilation is recommended to maintain vapor exposures below recommended limits. Where concentrations are above recommended limits or are unknown, appropriate respiratory protection should be worn. Follow OSHA respirator regulations (29 CFR 1910.134) and use NIOSH/MSHA approved respirators. Protection provided by air purifying respirators against exposure to any hazardous chemical is limited. Use a positive pressure air supplied respirator if there is any potential for uncontrolled release, exposure levels are unknown, or any other circumstance where air purifying respirators may not provide adequate protection.
