- Skin contact : Take off contaminated clothing and shoes immediately.
Wash off with plenty of water for at least 15 minutes and consult a physician if feel uncomfortable.
- Ingestion : DO NOT induce vomiting.
Never give anything by mouth to an unconscious person.
Call a physician or Poison Control Center immediately.
- Inhalation : Move victim into fresh air. If breathing is difficult, give oxygen.
Do not use mouth to mouth resuscitation if victim ingested or inhaled the substance.
If not breathing, give artificial respiration and consult a physician immediately.

4.2 Most important symptoms and effects, both acute and delayed

Substance accumulation, in the human body, may occur and may cause some concern following repeated or long-term occupational exposure.

Ingestion is likely to be harmful or have adverse effects.

4.3 Protection of first-aiders

First Aid responders should pay attention to self-protection, and use the recommended personal protective equipment when the potential for exposure exists.
Ensure that medical personnel are aware of the substance involved.
Take precautions to protect themselves and prevent spread of contamination.

4.4 Notes to physician

Treat symptomatically and supportively.
Symptoms may be delayed.

5. FIREFIGHTING MEASURES**5.1 Extinguishing media**

- Suitable extinguishing media : Small Fire: Dry chemical or CO2; Large Fire: Water spray or fog.
- Unsuitable extinguishing media : Don't use water spray directly in the leak or safety equipment, otherwise may cause icing.

5.2 Specific hazards arising from the substance or mixture

Development of hazardous combustion gases or vapor possible in the event of fire.
May expansion or decompose explosively when heated or involved in fire.

5.3 Advice for firefighters

As in any fire, wear self-contained breathing apparatus (MSHA/NIOSH approved or equivalent) and full protective gear.
